

## Reference Zigrin Security

### To whom it may concern

When looking for penetration testing services, Zigrin was recommended through a highly-reputed Luxembourgish organization.

After some preliminary interactions, we (Luxembourg Armed Forces) conducted this exercise together through Zigrin - with a very positive outcome.

Zigrin Security is highly responsive, able to interact very effectively with their customers, provides high-quality penetration tests and thorough reports - all on time and budget. I can highly commend Zigrin's penetration test service. In fact, we will be using them for more work in the future.

Kind Regards,  
Jan Beutler
